

PHAM TUAN DAT

Full Stack Developer Intern

Name	Pham Tuan Dat	Birth	09/11/2004
Phone	0334836597	Email	pdat100111@gmail.com
Address	Dai Thanh Commune, Hanoi	Portfolio	https://tuandatdev.netlify.app
Github	https://github.com/Tuandat911dev		

Overview

- Full Stack Developer with 1 year of hands-on internship experience in corporate environments. I have practical experience developing and maintaining features within Microservices systems using Java (Spring Boot) and PHP (Laravel).
- Since graduation, I have focused on expanding my technical stack by acquiring skills in ReactJS (JavaScript/TypeScript) and modern Frontend workflows. I am capable of building and deploying end-to-end applications, from designing responsive UIs to implementing Backend logic and containerizing services with Docker. I am a quick learner with a "can-do" attitude, committed to contributing effectively to the success of development teams.

Work experience

06/2024 - 01/2025

BACH KHOA HA NOI TELECOMMUNICATIONS & INFORMATION TECHNOLOGY SERVICE IMPLEMENTATION, TRAINING JOINT STOCK COMPANY

Java Backend Intern

- Participated in developing new features and maintaining existing modules for real-world enterprise applications using Java Spring Boot.
- Gained hands-on experience working within a Microservices architecture, focusing on independent service development and communication.
- Identified, analyzed, and resolved software bugs (Fixing bugs) to ensure system stability and performance.
- Collaborated with the technical team to understand project requirements and translate them into efficient backend logic.
- Self-studied and applied Spring Boot best practices under senior mentorship to build scalable web services.

02/2025 - 06/2025

KIAISOFT VIET NAM COMPANY LIMITED

Full stack Developer Intern

- Participated in an intensive technical training program focusing on Full-stack development standards for outsourcing projects.
- Acquired practical knowledge in building RESTful APIs using PHP (Laravel) based on project requirements and specifications.
- Involved in initial database schema design and creating core coding frames for web-based applications.
- Studied Frontend development with Vue.js, focusing on component structures and data binding.

Education

2022 - 2025

BKACAD Academy of Technology

- Major: Information Technology
- GPA: 8.6 / 10
- Classification: Excellent

12/2025 - Now

Hanoi University of science and technology

- Major: Electronics and Telecommunications Engineering

Skills

Back - end: Java (Spring Boot), PHP (Laravel)

Front - end: ReactJS (JavaScript/TypeScript), Vue.js, HTML5, CSS3, JavaScript

Databases: MySQL, PostgreSQL

Architecture & APIs: RESTful APIs, Practical experience in Microservices environments

DevOps & Tools: Docker (Containerization), Git (GitHub/GitLab)

Operating Systems: Linux (Ubuntu), Windows

Projects

Trendora – Fashion E-commerce & Inventory Management System

Git	Back-end: • https://gitlab.com/PhamTuanDat/back-end-trendora Front-end: • https://gitlab.com/PhamTuanDat/admin-front-end-trendora • https://gitlab.com/PhamTuanDat/front-end-trendora
Descriptions	A full-featured e-commerce platform for fashion retail with integrated payment and security systems.
Number of members	1
Position	Full stack developer
Responsibilities	- Developed a complete End-to-End web application. - Implemented Secure Authentication and Role-based Access Control. - Integrated Online Payment Gateway and Third-party Services (Social Login, Email). - Optimized performance using Caching and Data Persistence strategies.
Technology in use	- Backend: Java (Spring Boot), Spring Security (OAuth2), Spring Data JPA, MySQL, Caffeine Cache, Email Service, VNPAY API. - Frontend: Vue.js. - Architecture: Monolithic. - Messaging/Cache: WebSocket (STOMP), Caffeine Cache. - DevOps/Tools: Docker, Docker Compose, Git.

LeoLaptop – Laptop Retail & Order Management Platform

Git	https://github.com/Tuandat911dev/Leo-Laptop.git
Descriptions	A specialized web application for high-end laptop retail, focusing on catalog management and customer experience.
Number of members	1
Position	Full stack developer
Responsibilities	- Designed and developed the system following the Spring MVC architecture. - Built a dynamic product management module with complex technical specifications. - Implemented a responsive shopping cart and checkout workflow.
Technology in use	- Backend: Java (Spring Boot), Spring MVC, MySQL. - Frontend: HTML5, CSS3, JavaScript, Bootstrap. - Architecture: Monolithic.

PageTurner – Online Bookstore & Library Management

Git	https://github.com/Tuandat911dev/pageturner-ecommerce-web.git
Descriptions	A modern online bookstore platform focusing on a high-quality user interface and smooth API integration.
Number of members	2
Position	Frontend Developer
Responsibilities	- Developed the entire User Interface using ReactJS with TypeScript for type safety. - Utilized Ant Design (Antd) to build professional and consistent UI components. - Collaborated with Backend developer to integrate RESTful APIs for seamless data flow.
Technology in use	- Frontend: ReactJS, TypeScript, Ant Design (Antd). - Backend: NestJS.
